

CORE OFFER BUDGET FOR STREET CLEANSING

WHY DOES THE COUNCIL HAVE TO PROVIDE THIS SERVICE AND WHAT DOES IT NEED TO COVER?

The Council has a duty under the Environmental Protection Act 1990 to ensure so far as reasonably practicable “footpaths and the highway are free from litter”.

HOW DOES THE CORE OFFER BUDGET MEET THE COUNCIL’S OBLIGATIONS?

The proposals to reduce the service below are a judgement of what is believed to be the minimum level of resource to meet the Council’s duty.

DOES THIS DIFFER FROM THE CURRENT SERVICE?

To reduce the amount of street cleaning carried out across the Borough to what is the statutory minimum and to stop carrying out any environmental crime enforcement. The reduction in street cleaning will be Borough-wide however the town centre and arterial roads into town will continue to be prioritised.

The details of the reductions are set out below, which will have the overall impact of increasing the amount of litter, dog fouling, fly tipping and other environmental crime across the Borough.

Services for street cleaning will be reduced as follows:

- **Reduce Large Mechanical Sweepers to one from two**
Impact: Frequency of mechanical sweeping would half, which would have an impact on litter and detritus within the road channels. Also potentially impacting on blocked gullies.
Existing frequency: Main roads into town and the town centre are all swept at least weekly. The rest of the road network is swept on a five-weekly programme.
Frequency following cuts: Main roads into town and the town centre are swept fortnightly. The rest of the road network is swept on a ten-weekly programme.
- **Town Centre Cleansing – reduce from two staff to one**
Impact: Reducing the resource in the town centre from two members of staff to one will have significant impact on litter throughout the town centre and town centre fringe.
Existing frequency: Town centre and fringes maintained by two members of staff throughout the day.
Frequency following cuts: Town centre will be maintained by one member of staff only throughout the day.
- **Stop the operation of the Town Centre Water Feature, which currently operates May to October**
Impact: During summer the water feature enhances the town centre.

- **Mechanical Path Sweepers – reduce from the current four to two**

Impact: Small mechanical path sweepers focus on the town centre, back lanes and general pavement sweeping across the Borough. They have recently been reduced from six to four; a further reduction to two machines would see a significant reduction of standards across the town.

Existing frequency: Currently one sweeper is dedicated to back lanes cleansing on a weekly basis, a second to the town centre and response work, the third sweeping front streets on a fortnightly basis in more heavily littered areas of town such as some of the terraced property areas, some of the social housing areas and generally others that are more heavily littered, and the fourth sweeper on a two-monthly programme visits the less littered areas across the Borough.

Frequency following cuts: With only two path sweepers, back lane sweep and cleanse would be carried out on a fortnightly basis and the more littered front street areas on a monthly basis. The town centre would continue to be swept daily with response work being carried out when resources available and no mechanical path sweeping in less littered areas of town.

- **Litter Response/Litter and Dog Bin Emptying/Back Lane Cleanse – reduce from 11 staff to 6**

Impact: Currently there are three litter response crews carrying out a number of planned and responsive work, three dedicated staff to litter bin empty across the Borough and one back lane cleansing crew, which follows refuse collection. This service would be significantly reduced to a team of six, two staff focusing on litter bin emptying therefore the number of litter bins across the Borough would need to be reduced and/or the frequency of emptying also reduced. There would then be two crews to deal with all response work as well as back lane cleansing. These changes, alongside other proposals, will have a major impact on the cleanliness of the Borough.

Existing frequency: Litter/dog bins are currently emptied anywhere from daily (bins around the town centre) to weekly, with the majority being emptied twice per week. Back lanes are currently cleansed weekly and fly tips removed within two days. Response crews also have a significant number of weekly jobs supplementing other services.

Frequency following cuts: With only two members of staff for litter bin emptying, frequency will be reduced to weekly for all bins other than town centre alongside, where possible, reducing the number of bins. Back lane cleanse will reduce from weekly to fortnightly, fly tipping response work will only be able to be carried out when resources are available.

- **Manual Street Cleansing – reduce from six Street Scene Orderlies to three, reducing cleansing across the Borough**

Impact: There are currently six street orderly litter rounds across the Borough where areas are attended to between weekly and fortnightly, this would change to between fortnightly and monthly, depending on the area and resources available.

Existing frequency: There are currently six dedicated litter rounds with the majority of areas being visited once per week and the more heavily littered twice per week. The six rounds in the following areas:

- Eastbourne including Firthmoor, Lascelles and some of Bank Top
- Skerne Park, Park East and some of Bank Top
- Cockerton, some of Brinkburn & Faverdale and some of Pierremont
- Northgate, College and some of Pierremont

- Red Hall, Lingfield and some of Haughton & Springfield
 - North Road, Harrowgate Hill, some of Stephenson and some of Park East
- In addition to the above, on an ad-hoc basis as resources are available, Park West, some of Haughton & Springfield, some of Brinkburn & Faverdale, Mowden and Hummersknott as required.

Frequency following cuts: Each litter round will be cleansed on a fortnightly basis with the ad-hoc round getting minimal attention, only when resources are available.

- **Environmental Crime Enforcement**

The Council would not carry out investigations into environmental crime, issue no fixed penalty notices or prosecutions through the court for fly tipping, abandoned vehicles, dog fouling, littering, refuse, graffiti and other associated environmental crime, therefore fly tipping would not be investigated, there would be no resource to deal with residents putting out bins in the wrong place or time, or leaving them on the pavement, or dealing with hot spot littering, dog fouling, etc.

Impact: This will potentially have a major impact on the appearance of the environment and environmental crime will increase as there is no deterrent.

The cumulative impact of reducing street cleaning resources and stopping environmental crime enforcement will have a significant impact on the overall appearance of the environment across the Borough.

This significant reduction in resources for street cleaning from currently 29 staff to 17, a reduction of 12 employees, 41% of the resource, would take out any resilience for sickness or holidays therefore for a significant proportion of the year standards would be worse and the absolute minimum. In addition, currently the emptying of litter bins and street cleansing takes place on a weekend across the Borough as street cleansing is a seven-day service, this significant reduction in resource would impact on the ability to carry out this work with only limited resource being available to litter pick in the town centre on a weekend.

One team leader post to be reduced as part of this proposal as well as all 3 employees within the Environmental Crime Enforcement Team leaving no resource in this area.

The Code of Practice for Litter and Refuse within the EPA 1990 Section 89 places a duty on local authorities to ensure that “so far as reasonably practical, footpaths and highways are free from litter and clean”. Individuals or legal persons have the right to take action via the Magistrate’s Court against those not complying with the duty to keep land clear of litter or refuse or highway clean. If the Magistrate’s Court finds against the Council, it can then order that the land is cleaned. Failure to comply is a criminal offence punishable by a maximum fine of £2,500.

WHAT IS THE CORE BUDGET MADE UP OF?

2019/20 budget £1,070,952

	Budget 2019/20 £
Employee	549,199
Premises	4,438
Transport	453,409
Supplies & Services	24,069
Third Party Payments	1,214
Support Services	33,650
Income	(44,003)
Overheads	48,976
Total	1,070,952

Majority of the cost of service is staffing and vehicle and plant.
