

How to  
report content on

SOCIAL

MEDIA

sites to get it removed.

Most websites have a way for you to ask them to remove content such as videos, pictures comments or profiles.

It is important to know that making a report doesn't mean the content will definitely be removed. Most websites have a set of rules which they expect people using their site to obey, they will take content down if it breaks one of these rules.

If you want content to be removed you need to check if it breaks one of their rules.

Altogether Better Policing
