

DAY IN THE LIFE OF AN APPRENTICE

**Robert
Galt**

**Carpentry and Site
Joinery**

Why did you choose an Apprenticeship?

I am a practical learner so taking the apprenticeship route means I could do the majority of my learning outside of academia.

What benefits does an Apprenticeship have?

Being paid whilst learning my trade.

What skills do you feel you've developed during your time with us so far?

My communication and confidence has grown a lot whilst being in this apprenticeship as well as my practical skills whilst at work.

What do you hope to get out of your apprenticeship? What will this progress you onto?

I would like to carry on in education moving onto higher levels on carpentry at university.

Why would you recommend it to others?

This course is amazing for people who love to work practically and enjoy expanding their knowledge on carpentry.

Tell us about your typical working day - what kind of work have you been/are you doing?

Typical working days/ hours: 4 days a week / 7:30 - 3:30

Typical daily tasks carried out: First fix and second fix joinery

Unsupervised work: Hanging doors and cutting and fixing second fix components such as skirting and architraves.

Supervised work: Refurbishing a listed library roof

TEES VALLEY MAYOR
